1132 Southern Ohio/Kentucky Section

Hosted By: The Bionetics Corporation,
October 23, 2008.

A small contingent of NCSLI members from the Southern Ohio/Kentucky Section met 23 October 2008 for the Fall 08 gathering at the Granville Inn, Granville, Ohio. Mr. Patrick Butler, 1135 Michigan Section Coordinator, travelled from Farmington Hills to attend. The Bionetics Corporation, Newark Metrology Operations and operator of the Air Force Primary Standards Laboratory sponsored our meeting and provided breakfast for the attendees. We opened the meeting with a review of the minutes from Orlando's NCSLI Board of Directors meeting and member benefits. We announced a planned NCSLI Regional Training Event at Battelle, Columbus, Ohio February 11-12, "Fundamentals of Metrology." The agenda included the presentation of two papers selected as alternates for the 2008 NCSLI Conference. Mr. Tony Oiler, Bionetics Calibration Procedure/Technical Orders Department Manager presented information based on Mr. Chris Anderson's paper *Building the Path to Valid Calibrations: the Documented*

Calibration Technical Order (CTO). Next, Mr. David Cooper, Bionetics Photonics Engineer, discussed the calibration of high energy lasers based on his paper *Calibration Process of High Energy and Power Laser Measurement Devices Using a Primary Standard*. The meeting continued with a 45 minute open floor session during which Mr. Dave Nebel highlighted the importance of participation in the Metrology Ambassador program. After lunch, Mr. Henrik

S. Nielsen, HN Proficiency Testing, Inc. educated the crowd concerning the finer aspects of Torque Wrench calibration proficiency testing. Our program concluded with a door-prize drawing where our lucky winner took home a beautiful Ohio State University duffle bag. Go Bucks!
