1312 Chicago Section

Hosted By: InnoCal/
Cole-Parmer/Davis
Instruments
June 9, 2009

The NCSLI Chicago Illinois held its spring meeting on June 9, 2009. Hosted by InnoCal, Cole-Parmer and Davis Instruments, the attendees were treated to a lunch and a full day of good information and fun.

The meeting was a success with 32 attendees from around the region. The meeting started with presentations of the updates on NCSLI activities and news regarding the annual conference presented by Robert Collins of InnoCal.

James Jenkins of Quametec, Inc. gave presentations on "Uncertainty Software updates and QIMTonline.com training" and Phil Smith of A2LA gave presentations on "Specifying Accredited Services" and "Most Common Deficiencies" A lively discussion followed on both of Phil's topics.

Robert Collins of InnoCal led a spirited Roundtable Discussion on "Best" Vs. "Measurement" Uncertainties. The day concluded with a tour of the expanded InnoCal calibration lab and was followed up with a volunteer meeting.

We closed the meeting with a number of door prizes. Our next meeting will be in the late fall of 2009.

Robert Collins, Section Coordinator
